

Extraordinary Cruising

Power, safety and a huge space on deck make the Strider Zeta R an extraordinary boat, perfectly able to complement a superyacht on its cruises or at anchor. The low centre of gravity, the wide beam and big tubes provide an excellent stability. With a generous sun pad and two dining tables many people can reside on board. The maximum speed exceeds 50 knots and the helm position is equipped with sliding side doors to ensure safety. Below the deck, compartments and furnishings can be changed according to the owner's requirements. The hard top version offers complete protection against bad weather conditions.

Mast Packaging

P&M Packing offers a unique mast packing system, developed in-house, which is suitable for either aluminium or carbon masts and is made up from a combination of packing materials to create a lightweight, yet robust protection for these delicate, valuable spars. Strengthening is reinforced around lifting points and integral support cradles are built around the packed rig, which provides protection whether in transit or storage. This system for packing masts and spars of all sizes can be installed by the P&M Packing mast packing team.

Twin Anchor Handling

Quick Srl is headquartered in Italy where the company has been developing top quality marine equipment and accessories since 1983.

At the recent Dubai Boat Show, luxury motoryacht builder Gulf Craft announced a new partnership deal with Quick. Under the agreement, Quick will be the supplier of equipment for Gulf Craft's new Gulf 95 EXP motoryacht with the concept of 'comfortable living on the water' at its heart. One of the Quick products on board is a twin anchor handling system. Quick manufactures the anchor handling system, and all its other products, at its own premises in Italy.

Lighting Management

Yachtica's Dolphin range is developed to replace the use of many different products for managing LED lighting. A single Dolphin can drive LEDs of varied types, shapes and sizes. Integrated functions for example include an output with multi-current and multi-voltage. Yachtica products are approved by the most important European quality institutes such as KEMA, VDE and ETL, to satisfy the various market requirements. All products are made in accordance with the strictest safety regulations. Furthermore, vigorous testing is carried out to ensure a high standard of quality and reliability.

All in One

Award-winning communications integrator e3 Systems claim that their eVSAT (Very Small Aperture Terminal) service makes buying a VSAT solution simple, fast, and easy to understand as they can deliver the antenna, below-deck equipment, service installation and service contracts, together with 3G and Inmarsat services – all in one package. Training and support is included too. The company provides the services as an alternative to approaching individual VSAT service providers or dealers. Recently, e3 Systems celebrated the signing of their 100th VSAT contract.

Wider & Wider

Wider created a new category of yacht – the Wider Cockpit. It is an extraordinary concept and a yacht with strong design connotations, enabling the owner to enjoy an incredible mix of adrenaline and recreation. Most importantly, it is a versatile yacht able to change and adapt to satisfy a wide range of demands, offering total comfort and pure relaxation. The very first model of the Wider fleet is a 13m open day-cruiser, which developed from Titti Antonelli's patented idea and features lines by Fulvio De Simoni.
